

Section view of wetting pattern around Safety Flow and T-tape based on TDR measurements in a sandy loam (Trial 1)

Safety Flow 8l/hr/lm no top membrane

T-tape 8l/hr/lm

Note: Beds only received 43% of intended volume due to lack of pressure in supply line

Width of Wetting Patterns
Sandy Soil Wetting Pattern 900 mm
Sandy Loam Wetting Pattern 1.2m
Clay Wetting Pattern 1.6m
